Operations, software and content. I turn unstructured work into systems people actually use.

EXPERIENCE

Nov 2022 —	Operations Manager & Systems Architect Janata Bazar · Kolkata • Direct fresh produce retail and wholesale across 19+ franchise outlets in South Kolkata, procurement through to shelf. • Engineered a zero-inventory-capital operating model, keeping working capital free while scaling outlet count. • Run the wholesale division: inter-market trading, bulk imports, sesame exports and HoReCa supply. • Architected and specified three Android apps — farmer, customer, delivery partner — and drove them to release with a development team. • Connected all point-of-sale terminals to a central server, replacing next-day manual entry with live data and ending persistent billing losses. • Build internal tooling directly with Codex and Claude Code, in daily use by non-technical staff; co-lead the content pipeline across YouTube and Facebook.
Ongoing	Founder Panee · agri-tech • Supply chain traceability aimed at price certainty for smallholder farmers, who commonly sell 10–30% below MSP for lack of storage and immediate cash needs. • Verified farm-to-shelf data for grocery chains. Brand identity and logo designed in-house.
Mar 2020 —	Content Writer & Developer Polkadex, XinFin, AnRKeY X, Cronos World, Asva Labs • Technical content, operational literature and strategy across five blockchain ecosystems: translating distributed systems, trustless verification and token mechanics into material non-specialists can act on.
2011 — 2017	Assistant Director, Director, Producer Kolkata film and theatre · freelance since • Assistant director on <i>Devi</i> (Tollywood feature, starring Paoli Dam): cross-functional crews, scheduling and ground execution under hard deadlines. • Ten short films as actor and crew, including SRFTI projects. Ad films including the Indian Super League. • Two directorial and four acting credits in Kolkata theatre; co-founded Performers Anonymous. Scripted digital content for hoichoi and addatimes.

SELECTED WORK

2026	Job Triage Built end to end · bhola1991.github.io/job_triage • Reads any CV, generates realistic career directions, then finds and ranks roles on two independent axes: fit, and whether the employer will actually reply. • Reads Greenhouse, Lever and Ashby public feeds directly rather than scraping. Schema-drift handling, deduplication, confidence tracked separately from score. • Single HTML file, no backend. LLM-backed extraction, batch scoring and classification.
